Sir:

Responsive to the Office Action mailed May 22, 2002, please amend the above-captioned application as follows.

IN THE SPECIFICATION:

In accordance with 37 C.F.R. § 1.121(b)(1), please amend the specification by substituting the following paragraphs for the corresponding paragraphs originally filed, as indicated below. The changes are shown explicitly in the attached "Version with Markings to Show Changes Made."

Please replace paragraph starting on page 2, line 4 and line 12 with the following:

A1
Since the connection part 3a is formed with the cut-out parts 3d and the louvers 3e in this core structure, and the heat transfer through the corrugated fins 3 is obstructed by the cut-out parts 3d and the louvers 3e in the core part of this integral heat-exchanger, it is possible to restrain thermal interference such that heat is transferred, for example, from the higher temperature second heat-exchanger tubes 2 toward the lower temperature first heat-exchanger tubes 1 through the intermediary of the corrugated fins 3.
